

## Hydra - Self cleaning filter system (with bracket & spanner)

Turn the tap at the bottom and the *spring* loaded filter filter expands to knock of the dirt to drain.

Filters available:

- 90 micron polyester **net** - simple and cheap
- 90 micron stainless **steel** net - lasts well and strong
- 50 micron pleated - **high** surface area, stops smaller particles

### HYDRA (SINGLE) Self cleaning filter

- |            |  |  |
|------------|--|--|
| 1611000004 |   | Hydra 3/4" c/w polyester 90µm filter           |
| 1611000029 |  | Hydra 1" c/w polyester 90µm filter (6000 l/hr) |
| 1611000025 |  | Hydra 3/4" c/w S/S net 90µm filter (5300 l/hr) |
| 1611000026 |  | Hydra 3/4" c/w pleated plastic net 50µm filter |
| 1711000012 |  | 90 micron Polyester cartridge                  |
| 1711000007 |  | 90um Stainless Steel cartridge                 |
| 1711000008 |  | 50um Polypro Pleated cartridge                 |

Drain Funnel

Back flow preventing device  
UN EN 1717-11/2002

### HYDRA (TRIO) Self cleaning filter (with bracket & spanner)

Used in rain water harvesting applications & private water supplies (springs, boreholes etc). Pre filter with manual spring assist cleaning to remove most of the debris. Sediment filter to remove particulates and carbon to reduce organics, and colour (in conjunction with UV).

1611000005 Hydra trio with bracket

height	390 mm
width	336 mm
depth	106 mm

Max Flow	2500 l/hr
In/OUT	3/4"
Pressure	1.8-8 bar
Temperature	4-45°C

90um hydra, 25um sediment, GAC

replacement filters: see chapter for prices
