

Micro Water Softener

Ultra small softener for very small houses or single applications such as dishwashers.

Scale builds up in pipes, boilers, washing machines and dishwashers. Just a small layer of scale causes loss in heating efficiency and £100's to heating bills. Softened water stops scale build up and can remove existing deposits.

Micro softeners are:

Ultra compact – fits in the smallest of spaces

Reliable – uses the renowned Autotrol 255 valve

Simple – Very simple to set up.

Advanced – efficient and quiet

Uses the ultra reliable Autotrol Logix multiport valve on top of a robust white plastic cabinet.

Dimensions:

Height: 520 mm

Width: 195 mm

Depth: 430 mm

Specification

Autotrol 255 time based valve.

Resin: 4 litres

Capacity (at 300ppm hardness): 667 litres

Salt usage: approx 0.5 Kg/regeneration

Connections

In/Out: $\frac{3}{4}$ " BSP (washing machine type)

Drain: $\frac{3}{4}$ " BSP
